■

Brennan Healing Science® is an enlightening system of energy work that combines hands-on healing techniques with spiritual and psychological processes... touching every aspect of your life.

Brennan Healing Science is based on the living dynamics of our human energy consciousness system and its relationship to one's self, to others and to the greater world. This energy system reflects the health of one's thoughts and emotions, which sets the template for the state of our lives physically, mentally and emotionally.

This lecture and workshop are designed to give you a thorough and experiential introduction to the transformative work of Brennan Healing Science. It begins on Friday evening with a lecture on *The Four Energy Dimensions of Humankind*, and continues with a workshop on Saturday and Sunday.

The workshop will be led by a graduate of the Barbara Brennan School of Healing Advanced Studies Program.

The format of this workshop will include lectures, healing demonstrations, guided exercises and meditations, hands-on healing techniques, practice healings, and self-healing exercises.

By joining us, you will be introduced to your ability to give hands-on healing to others, as well as starting to open your latent ability to perceive the human energy field. This is a rare opportunity to step into an expanded view of life, where we see that we are more than just our physical bodies.

*We are beings of energy and consciousness!*

These teachings on human energy and consciousness, health, healing and self-awareness are at the cutting edge of human development. The Barbara Brennan School of Healing academic 4-year program is recognized as a Bachelor of Science by the Florida Commission for Independent Education.

Come experience this weekend and return to your life renewed, open-hearted and transformed!
